

The LowLine is a proposed underground park in New York which, if built, would be the first of its kind anywhere in the world.

From radar to the Typhoon, we have an unprecedented history in innovation firsts. However, we don't rest on our laurels. In the last few years we're proud to have launched the Type 45 destroyer and Astute submarine. And we are continually developing new technologies – like cyber security – because it's only by moving forward that Britain will remain a global leader.

# OUR FIRSTS IN ENGINEERING HELP THE UK STAY A WORLD LEADER IN INNOVATION.

# POWERED BY WHAT'S INSIDE

## Engineers & Maintenance Technicians Wanted

**Engine Manufacturing Centre, Wolverhampton & Coventry (Relocation offered)**

Help shape the most cutting-edge and advanced Engine Manufacturing Centre ever built in the UK. Deliver the world-class engines that will power the world's finest cars. Drive our success with your fresh-thinking, skills and determination.

LIFE MATTERS

We gained a reputation  
for engineering excellence,  
one detail at a time.

We know it's the small things that make a big difference. In fact it goes a very long way towards explaining why Rolls-Royce has become a world-leader in power systems and services on land, at sea and in the air. With manufacturing and service facilities in 50 countries and customers in well over 150 countries, we place a great deal of importance on the detail in order to maintain the very

highest standards that our name has become associated with. It's what our clients have come to expect and we don't do it lightly. Last year alone we invested close to £1 billion in research and development of our products and services. And, like everything else we do, we did it one detail at a time.

**Trusted to deliver excellence**
